

Connecting to the Myturn Hotspot

In the Settings app, select WiFi and click on “BeagleBone-MyTurn”

Otherwise, select a name like “BeagleBone-08BB”

If it prompts for a password, enter “BeagleBone”

Start your Chrome (or Opera or Dolphin) browser and enter: 192.168.8.1

If this fails, in the Settings app select WiFi. There are 3 vertical dots in the upper-right corner. Touching them brings up “Advanced” as one of the options, where you can find your IP address. If it's 192.168.8.102, connect your browser to 192.168.8.1 (replacing the last octet with a 1). The MyTurn app appears.

If you do not feel any vibrations once the session starts, press the volume-down key. If you see "Alarms only Until you turn off Do Not Disturb" with an option "END NOW", touch "END NOW".
